

HIGH DEFINITION (HD) COMPACT VMS

OVERVIEW

Bartco UK's HD Compact VMS is the first temporary variable message sign (VMS) designed for use within work zones in order to improve safety. The HD Compact VMS is a High Definition dual colour (white and red) variable message sign and was developed in response to feedback from customers.

Weighing less than 10kg this lightweight sign case can be installed on existing street furniture or on its own battery box and post.

Also available in a mains-powered format or with battery and solar power, the HD Compact VMS can be used within a fixed, permanent context on urban highways.

KEY FEATURES

- Compact 680mm x 780mm size
- Red and white LEDs for text and pictograms
- 28 x 28 pixels
- 20mm pixel pitch
