

REMOTELY OPERATED TEMPORARY TRAFFIC MANAGEMENT SIGNS

OVERVIEW

Remotely Operated Temporary Traffic Management (ROTTM) signs are a permanent fixed variable message sign (VMS) used to warn motorists of lane closures on Smart Motorways for planned works.

The ROTTM signs are available in two sizes.

- The Standard 12B (185kgs) has a 1900mm x 1600mm LED display area
- The Narrow 9(5) (145kgs) has a 1280mm x 1600 LED display area

KEY FEATURES

- Red/white LEDs with a 20mm pitch
- Control system
- Hardwired communications via a single IP address
- SNMP v3 & UTM compliant
- Mains powered with on board 1 hour battery back-up
- Optional inertia switch that isolates the mains feed to the sign in the event of being struck by a vehicle
- Fitted with an external battery isolator switch
- Low power consumption
- Manufactured in the UK
